DESCRIPTORS *Ability Grouping; Age Grade Placement; *Annotated Bibliographies; Cluster Grouping; Educational Resources; Elementary Secondary Education; Ethnic Groups; Flexible Scheduling; *Grouping (Instructional Purposes); *Grouping Procedures; Heterogeneous Grouping; Homogeneous Grouping; *Minority Groups; Reference Materials; Resource Materials; Student Grouping; *Urban Education

ABSTRACT

This is the first of a series of Capsule Bibliographies on current issues in urban and minority education. It is a selection from a computer search using suitable descriptors matched against a standard Educational Resources Information Center (ERIC) Clearinghouse profile for urban and minority concepts. Such descriptors (subject headings) as grouping procedures, cluster grouping, grouping (instructional purposes), heterogeneous grouping, homogeneous grouping, student grouping, age grade placement, flexible scheduling, and ability grouping are used to encompass the concept of grouping practices. The bibliography covers materials in the ERIC System from January 1970 through March 1976. The cited items are arranged exactly as they have been printed by the computer. Citations are in descending order of ERIC number. Documents follow the journal articles in the bibliography. A categorized index to the references is provided. (Author/AM)

* Documents acquired by ERIC include many informal unpublished *
* materials not available from other sources. ERIC makes every effort *
* to obtain the best copy available. Nevertheless, items of marginal *
* reproducibility are often encountered and this affects the quality *
* of the microfiche and hardcopy reproductions ERIC makes available *
* via the ERIC Document Reproduction Service (EDRS). EDRS is not *
* responsible for the quality of the original document. Reproductions *
* supplied by EDRS are the best that can be made from the original. *

ERIC CLEARINGHOUSE ON URBAN EDUCATION

Teachers College-Columbia University - New York, N.Y. 10027

UD 016261

This bibliography is one in the ERIC/CUE Capsule Bibliography Series produced by the ERIC Clearinghouse on Urban Education under contract 400-75-0008 between the National Institute of Education (DHEW) and Teachers College, Columbia University. Additional copies will be available from:

ERIC Document Reproduction Service
P.O. Box 190
Arlington, Virginia 22210.

Its ED identification number and full ordering instructions will be found in Resources in Education, the monthly ERIC abstract journal or can be obtained by contacting ERIC/CUE.

Copies are also available from the Institute for Urban and Minority Education, Box 40, Teachers College, Columbia University, New York, New York 10027, for \$0.50 each.

The ERIC Clearinghouse on Urban Education is part of the Institute for Urban and Minority Education (IUME), an agency for human resource development and school organization improvement in the nation's cities. Founded in 1973, the Institute is sponsored by Teachers College, Columbia University, New York, New York 10027.

INTRODUCTION

This is the first of a series of Capsule-Bibliographies on current issues in urban and minority education. It is a selection from a computer search using suitable descriptors matched against a standard Clearinghouse profile for "urban and minority" concepts. Such descriptors (subject headings) as grouping procedures, cluster grouping, grouping (instructional purposes), heterogeneous grouping, homogeneous grouping, student grouping, age grade placement, flexible scheduling, and ability grouping were used to encompass the concept of grouping practices. The bibliography covers materials in the ERIC System from January 1970 through March 1976.

Journal articles, identifiable by the "EJ" prefix to their ERIC number, are not available through the ERIC system, but may be read in many public or college libraries. Other cited documents, identifiable by their "ED" prefixes, are available through the ERIC system, except where a statement to the contrary is noted; alternate sources of availability are then found in the citations. For complete availability statement, please see page iii.

The cited items are arranged exactly as they have been printed out by computer: citations are in descending order of ERIC number, and documents follow the journal articles in the bibliography.

A categorized index to the references is provided on page iv.

DOCUMENT AVAILABILITY

Documents cited in this bibliography with ED numbers can be obtained in microfiche and paper copy from the ERIC Document Reproduction Service, *unless otherwise noted*. To order copies, follow these instructions:

1. All orders must be in writing, prepaid or accompanied by an official purchase order.
2. Orders must state ED numbers, type of reproduction (microfiche or paper copy) and number of copies desired.

Microfiche: 4×6 inch sheets of film, each sheet containing up to 96 8½×11 inch pages and requiring special readers to enlarge the print.

Paper copy: a paper photo copy or facsimile of the original document.

3. Order from:

ERIC Document Reproduction Service (EDRS)
P.O. Box 190
Arlington, Virginia 22210

Social Issues in Special Education, Special Education: Trends and Issues

Bransford, Louis A. Phi Delta Kappan; 55; 8; 530-532 Apr 74

Descriptors: *Special Education/ *Grouping (Instructional Purposes)/ *Minority Groups/ *Testing/ *Mentally Handicapped/ Cultural Factors/ Ability Grouping

In the past two years more individuals than ever before have sued educational systems in the United States because of testing, labeling, and placement practices in the schools. Discusses solutions to those practices as they relate to special education in general and programs for the mentally retarded in particular. (Author/JF)

4. EJ094632 EA504822

The Great Sorting Machine. Special Education: Trends and Issues

Kirp, David L. Phi Delta Kappan; ; 8; 521-525 Apr 74

Descriptors: *Grouping (Instructional Purposes)/ *Handicapped/ *Ability Grouping/ *Special Education/ *Minority Groups

Discusses the case for identifying less restrictive categories and beginning a "desorting" process for the handicapped. (Author)

 A Cluster Program For High Risk College Students
 Beaver, David P. College Student Journal; 7; 2; 61-65 Apr-May 73
 Descriptors: *College Students/ *College Admission/ *Educationally Disadvantaged/ *Low Ability Students/ *Ability Grouping/ Student Ability
 A myriad of problems has arisen from the open door policy many institutions are pursuing. Not the least of these is the increasing presence of many high risk or academically disadvantaged students in classes where they are not adequately prepared to do college work. This article seeks to present an innovative approach to the problem. (Author)

 How Ability Grouping Fails
 Pindley, Warren Inequality in Education; 14; 38-40 Jul 73
 Descriptors: *Ability Grouping/ *Grouping (Instructional Purposes)/ *Test Bias/ *Minority Groups/ *Racial Discrimination/ Public Schools
 Discusses weaknesses and cultural biases of ability grouping systems and suggests methods for improving testing programs. (JF)

8. EJ082617 EA504032
 Separate and Unequal Again
 Green, Winifred Inequality in Education; 14; 14-16 Jul 73
 Descriptors: *Testing Problems/ *Ability Grouping/ *Equal Education/ *Minority Groups/ *Racial Discrimination/ School Integration/ Public Schools
 Discusses how testing and tracking affect students. Argues that grouping reinforces years of discriminatory treatment in the education of black children, locking them into classroom situations in which the stigmas and hopelessness are the same or worse than in the days of separate but unequal schools. (JF)

9. EJ078798 UD502253
 How Testing Harms Children
 Green, Winifred South Today; 4; 8; 6-7 May-Jun 73
 Descriptors: Ability Grouping/ *Intelligence Tests/ *Negro Education / *Racial Discrimination/ School Integration/ Social Discrimination/ *Special Education/ *Student Grouping/ Test Bias/ Testing Problems
 Discusses some children with whom the author has worked, and how the current definition of intelligence and the use of testing have affected their lives and then suggests some ways private groups can be involved in solving the problem. (Author/JM)

10. EJ060673 AA512975
 Three Approaches to Grouping Procedures for the Education of Disadvantaged Primary School Children
 Cartwright, G. Phillip; McIntosh, Dean K. Journal of Educational Research; 65; 9; 425-9 May-Jun 72
 Descriptors: Ability Grouping/ *Academic Achievement/ *Educationally Disadvantaged/ Evaluation/ *Grouping Procedures/ Heterogeneous Grouping/ Homogeneous Grouping/ *Primary Grades/ *Student Grouping
 Grouping heterogeneously, homogeneously, and flexibly made no significant difference in academic achievement in research done on 260 children over a 2-year period. (Editor)

Pupil Testing: A Legal View. Report No. 39.

Tractenberg, Paul L.; Jacoby, Elaine

ERIC Clearinghouse on Tests, Measurement, and Evaluation, Princeton, N.J.

Sponsoring Agency: National Inst. of Education (DHEW), Washington, D.C. Office of Dissemination and Resources.

Report No.: ERIC-TM-38

Contract No.: OEC-0-70-3797(519)

Publ. Date: Dec 74 Note: 26p.

Descriptors: *Ability Grouping/ Age Grade Placement/ Aptitude Tests/ Court Litigation/ Educational Accountability/ Educationally Disadvantaged/ Equal Protection/ Graduation Requirements/ Legal Problems/ *Low Income Groups/ Minority Groups/ Screening Tests/ Standardized Tests/ *Student Evaluation/ *Test Bias/ *Testing/ Test Interpretation/ Test Results/ Test Validity

Traditionally, local school boards have had the power to assign students to classes and to set standards for promotion and graduation; with this authority has gone the discretion to decide what role pupil testing will play in the local schools. Courts have been reluctant to interfere with school board decisions on methodology, of which they consider testing to be a part. They will intervene, however, when a constitutional right is affected by board policy or practice. They have done so consistently where racial or ethnic discrimination was involved in pupil testing. Children are given standardized tests on numerous occasions throughout their public school careers. In addition to standardized tests, teachers prepare and administer tests in various subjects. However, this paper is concerned primarily with standardized tests, since it is they that have been attacked in the courts. Each type of test that has been dealt with in court cases is treated here. Specifically, they are: group and individually administered intelligence, aptitude, and achievement tests. (Author/DEP)

Locator Tests: Useful or Ornamental?

Scott, Norval C.

Publ. Date: Apr 74 Note: 12p.; Paper presented at the American Educational Research Association Annual Meeting (Chicago, Illinois, April 15-19, 1974)

Descriptors: *Age Grade Placement/ *Elementary School Students/ Grouping (Instructional Purposes)/ Mathematics/ *Migrant Children/ Reading Level/ Test Reliability/ *Tests

Identifiers: Wide Range Achievement Test/ Zip Test

A comparison was made of the results of two locator tests, the Zip Test (ZT) and the Wide Range Achievement Test (WRAT), which were administered to 37 black migrant and resident pupils. The children were tested twice with each test: in early September and eight weeks after in November. Twenty-three children were taught by the Inquiry Method (Experimental) and 14 in the conventional mode (Controls). Results indicated that the ZT was a more reliable indicator than the WRAT for a child's grade location in math and reading, if the ZT undergoes modification in administration and scoring instructions. Neither test should be used diagnostically. (Author)

Zip Test.

Scott, Norval C., Jr.

Butte County Superintendent of Schools, Oroville, Calif.; California State Dept. of Education, Sacramento. Bureau of Community Services and Migrant Education.

Sponsoring Agency: Bureau of Elementary and Secondary Education (DHEW/OE), Washington, D.C.

Note: 24p.

Descriptors: Achievement Tests/ *Diagnostic Tests/ Elementary Grades / *Elementary School Mathematics/ *Grouping (Instructional Purposes)/ *Language Fluency/ Language Skills/ Language Tests/ *Migrant Child Education/ Migrant Children/ Reading Diagnosis/ Reading Level

A copy of the Zip Test, designed to determine quickly the grade placement of a migrant child in reading and math and to assess his English language facility, is presented. The purpose of the test is to locate the instructional level at which the child can effectively use mathematics and reading books and to indicate his ability to conceptualize verbally in English. The test is not intended for use in chronological grade placement. The test consists of a group of pictures of objects and activities, a series of simple words, six brief stories (each consisting of only a few sentences), a series of multiple-choice word opposites, a group of shapes and numbers, and a series of arithmetic problems. Two forms for use in recording the child's performance on the test and placement level are also presented. (KM)

Final Report of the Evaluation of the 1969-1970 Benjamin Franklin Cluster Program: Programs and Patterns for Disadvantaged High School Students. ESEA Title I.

Hoffman, Louis J.

Teaching and Learning Research Corp., New York, N.Y.

Sponsoring Agency: New York City Board of Education, Brooklyn, N.Y.

Publ. Date: 70 Note: 42p.

Descriptors: Class Size/ *Cluster Grouping/ Curriculum Development/ *Disadvantaged Youth/ Guidance Services/ High School Curriculum/ *High School Students/ Paraprofessional School Personnel/ *Program Evaluation/ Psychological Services/ Reading Skills/ Small Classes

Identifiers: *Elementary Secondary Education Act Title I Program/ Esea Title I Programs/ New York City

The Cluster Program at Benjamin Franklin High School, funded under Title I of the 1965 Elementary Secondary Education Act, is designed to be a school within a school in which 249 ninth grade students attend classes in two separate clusters. Each cluster is formulated such that all students receive instruction from five teachers in classes whose maximal size is 30. These cluster students also receive the services of paraprofessional aides, a counselor, and a part-time psychologist. Laboratories and skills centers in reading and mathematics were specially developed for the cluster program, and three curriculum developers produced new materials in mathematics, science, and social studies. Evaluation procedures included (a) collecting and analyzing all the school record information available, (b) analyzing records and documents produced by the cluster program staff, (c) interviewing teachers, counselors, and the cluster program psychologist, (d) administering questionnaires to cluster students, and (e) observation of classroom functioning. (Author/JM)

Descriptors: Class Size/ *Cluster Grouping/ Curriculum Development/ *Disadvantaged Youth/ Guidance Services/ High School Curriculum/ *High School Students/ Paraprofessional School Personnel/ *Program Evaluation/ Psychological Services/ Reading Skills/ Small Classes

Identifiers: *Elementary Secondary Education Act Title I Program/ ESEA Title I Programs/ New York City

The Cluster program, funded under Title I of the 1965 Elementary Secondary Education Act, is designed to be a school within a school in which the students receive the benefits of small class size, psychological support, and curricular innovation. The program this year was expanded to include both ninth and tenth year students. The two clusters of 150 students each receive instruction from five teachers in classes where maximal size is 30. The cluster students also receive the services of paraprofessional aides, guidance counselors, and a school psychologist. Laboratory and skill centers in reading and mathematics were specially developed for the program. Curriculum developers produced new materials in mathematics, science, reading, and social studies. In addition the program inaugurated this past year its phasing program in which students may select their own programs from a variety of courses lasting approximately four weeks each. Evaluation procedures included: (a) collecting and analyzing all record data information available, (b) analyzing records and documents produced by the cluster program staff; (c) interviewing teachers, counselors, etc.; (d) administering questionnaires to cluster students and faculty; and, (e) observation of classroom activities. This paper synthesizes the three substantive reports on ability grouping described in TM 000 501-503. It lists the characteristics of ability grouping as practised in American school systems. Extensive conclusions and recommendations, generally unfavorable to ability grouping are given. Alternative educational strategies for improvement of instruction are recommended. (PR)

Descriptors: *Ability Grouping/ Culture Free Tests/ *Disadvantaged Youth/ Early Childhood Education/ *Educational Strategies/ Grouping Procedures/ Heterogeneous Grouping/ Individualized Instruction/ Minority Groups/ Standardized Tests/ Student Grouping/ Team Teaching/ *Test Bias/ *Testing/ Test Interpretation/ Test Reliability/ Test Validity

Problems in the interpretation of standardized tests used to group children of limited backgrounds, cultural bias in tests, and the misuse of tests are considered. Reports on the use of specific tests with disadvantaged students are reviewed and some of the efforts being made to provide better interpretive data are discussed. Alternative strategies to homogeneous and heterogeneous ability grouping are suggested and described in some detail. The mutually compatible strategies include: individualized instruction, stratified heterogeneous grouping, student tutoring, team teaching, and early childhood education. An extensive bibliography and a list of test references are provided. See TM 000 501, 502, and 504 for other sections of this report. (PR)

A Pilot Study of the Effects of Heterogeneous and Homogeneous Grouping on Mexican-American and Anglo Children Attending Prekindergarten Programs.

Lurgett, Mary Ellen; Pirofski, Florence

Publ. Date: Feb 71 Note: 27p.; Paper presented at the American Research Association Annual Meeting, New York City, February, 1971

Descriptors: Anglo Americans/ Aspiration/ *Behavior Change/
*Cognitive Development/ Curiosity/ Economically Disadvantaged/
*Heterogeneous Grouping/ *Homogeneous Grouping/ Intelligence Tests/
*Mexican Americans/ Pilot Projects/ Preschool Children

Effects of heterogeneous and homogeneous grouping on the psychological functioning of Mexican American preschool children from economically disadvantaged families were investigated in a pilot project at San Jose State College Child Laboratory. Three experimental groups were composed of (1) 9 Mexican American children from low-income families and 9 Anglo children from middle-income professional families (heterogeneous), (2) 18 Mexican American children from low-income families (homogeneous), and (3) 17 Anglo children from middle-income professional families (homogeneous). Four measures of cognitive functioning and 3 behavioral measures were individually administered at the beginning of the school year and again 8 months later. Comparisons of mean gain scores on pre- and post-tests were computed. Data demonstrated that heterogeneous and homogeneous grouping both have a facilitating effect on cognitive growth and behavior modification. It was noted that further research is needed to identify the psychosocial dimensions of the learning environments in heterogeneous and homogeneous groups and to assess their contribution to cognitive change and behavior modification. Dimensions suggested in interpretation of data were the teacher's mode of coping with problem situations and interacting with children, the role of the teacher as a model for behavior modification and an agent of reinforcement, the nature of the interpersonal relationships among children, and the social-climate properties of the group. (JH)

Beyond Pygmalion: Galatea in the Schools.

Tuckman, Bruce W.; Bierman, Milton

Publ. Date: Feb 71 Note: 24p.; Paper presented at the Annual Meeting of the American Educational Research Association, New York, N.Y., February 1971

Descriptors: *Ability Grouping/ *Academic Achievement/ Attendance/ Grouping Procedures/ *High School Students/ *Junior High School Students/ *Negro Students/ Self Esteem/ Self Evaluation/ Student Attitudes/ Student Motivation/ Student Teacher Relationship/ Suburban Schools/ Suburban Youth/ Teacher Influence

Identifiers: New Jersey

The effect of a major success-failure symbol in the school and source of both teacher and student expectations—homogeneous ability-grouping—was studied via a true experiment. Four hundred and twenty-one black high school and junior high school students in a suburban-city school system were arbitrarily and without fanfare moved up to the next higher ability group while 384 comparable students were retained in their assigned groups as controls. Of those moved up, 54 percent were subsequently recommended by their teachers for the higher group as compared to one percent of the controls. Experimentals also achieved higher scores on standardized achievement tests. Thus, grouping assignment was shown to affect teacher expectations and student performance. (Author/JM)

29. ED034658 RE002318

The Effects of Grouping Disadvantaged Children for Reading Instructions in Grade 1.

Newport News Public Schools, Va.

Publ. Date: 69 Note: 10p.

Descriptors: *Beginning Reading/ *Disadvantaged Groups/ Grade 1/ Grade 2/ *Grouping (Instructional Purposes)/ Reading Improvement/ *Reading Instruction/ Reading Readiness/ *Reading Research

Reading achievement of disadvantaged pupils who were grouped for special instruction under the same teacher in grades 1 and 2 was compared to the reading achievement of disadvantaged pupils who were instructed according to regular classroom procedures in grades 1 and 2. Pupils in the experimental group (55) were matched with pupils in the control group (54) on readiness scores from the Metropolitan Reading Readiness Test, Form A, and on mental ability scores from the Pintner-Cunningham Primary Test, Form A, both administered during the first 2 weeks of school. The Stanford Achievement Test, Primary I, was administered at the end of first grade, and the Stanford Achievement Test, Primary II, Form Y, was given at the end of second grade. There were no significant differences between the control and the experimental groups on the two variables at the beginning of grade 1. Mean achievement test scores for pupils in the experimental group were significantly higher than those for the control group both in grades 1 and 2. A significantly higher percentage of pupils in the experimental group than in the control group were reading in grade level in grades 1 and 2. The findings suggested that grouping disadvantaged pupils for instructional purposes significantly improved their chances for progress in the first two grades. (WB)
